

# 1 Gang Click MiniGrid Style Antique Brass

## Features

- ▶ ENER-J's 1 Gang wireless grid switch is compatible with MK grid plus system and can be installed into MK grid plus plates.
- ▶ It can be used with the standard or with the dimming ECO Range receiving controller. It has a built-in micro energy generator - when the switch is pressed the kinetic system transforms the movement into energy. This transmits a signal to the receiver to turn the lamp or other load on or off. This solves the issue of having to install switch wiring which has been a problem ever since the invention of the lamp.
- ▶ Can be used alongside mains voltage grid switches.
- ▶ No Wiring. No Battery. Easy installation and usage.

IP Rating

No Battery

Can be used  
2 Way

No Wiring

Distance  
20m (indoor)

No Drilling  
of Holes

\*This product is not intended for use in metal back boxes

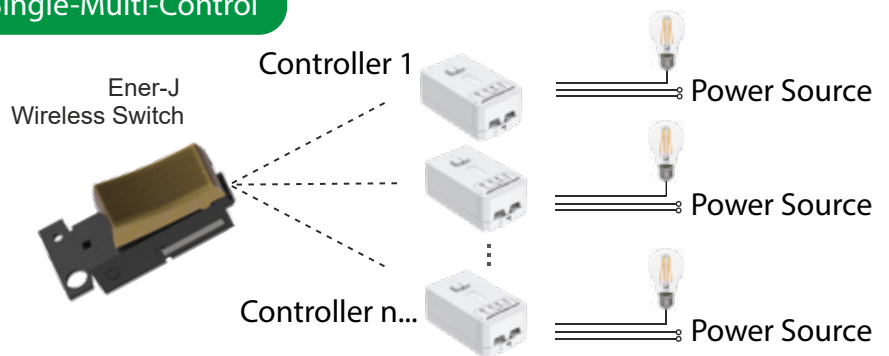

## Technical Specifications:

|                              |  |
|------------------------------|--|
| Work Type                    | Reciprocating work by Grid Switch                          |
| Power Model                  | Power generation by mechanical force (no battery required) |
| Work Frequency               | 433MHz   |
| Number Keys                  | 1 Key  |
| Colour                       | Antique Brass  |
| Lifetime                     | 100,000 times  |
| Distance                     | 20m (indoor)   |
| Work Environment Temperature | 20°C - 55°C  |
| Weight                       | 15g  |
